PAPILUMO / Pre-K (ages 4–5)

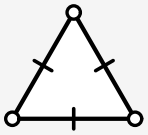

All About the Triangle Shape

Trace the dotted triangles, count the straight sides and pointed corners, then circle the triangular objects.

A triangle has 3 straight sides and 3 pointed corners!

Example: a triangle

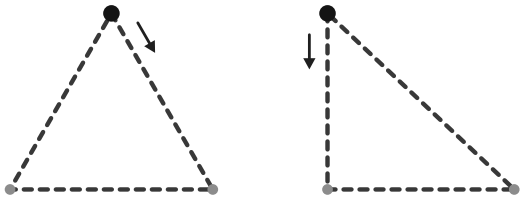

3 straight sides

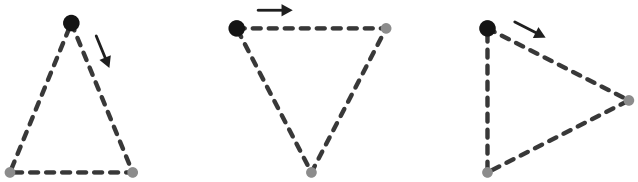

3 pointed corners

1. Trace the large and medium dotted triangles

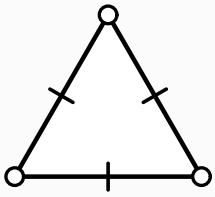

Large triangles

Medium triangles

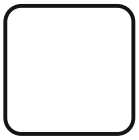

2. Look at the triangle and write how many straight sides and pointed corners it has

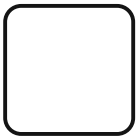

Straight sides

Pointed corners

3. Circle the four real-world objects shaped like a triangle

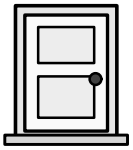

Pizza slice

Round ball

Camping tent

Door

Sailboat sail

Round clock

Yield sign

Balthazar's tip: slide your finger along each straight edge until you feel one of the three sharp corners!
