Missing Numbers 1 to 10: Garden Trails

Look at Bibi's snail example, fill in the four counting-up trails (+1), then complete the two counting-back trails (-1).

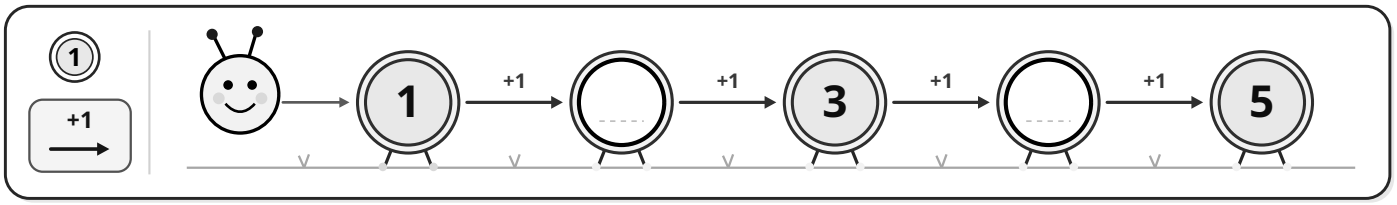

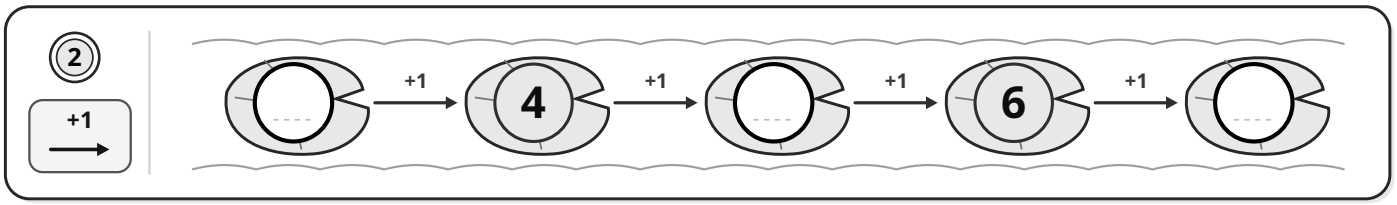

Ribbit! I'm Bibi the garden frog—follow the arrows on each path to fill in every missing number from 1 to 10!

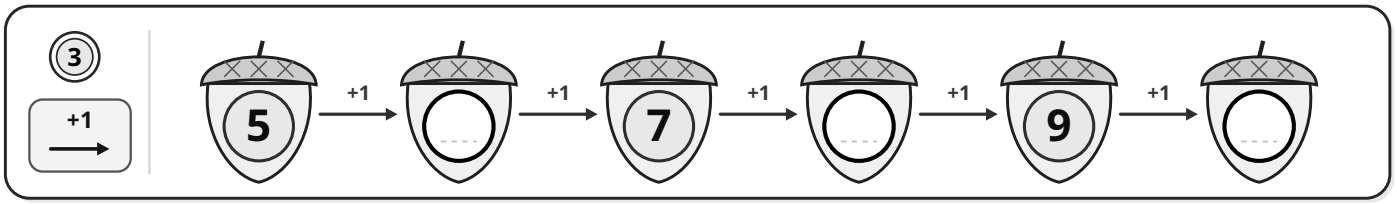

Worked example: count up +1 along the trail (1 - [2] - 3 - [4] - 5)

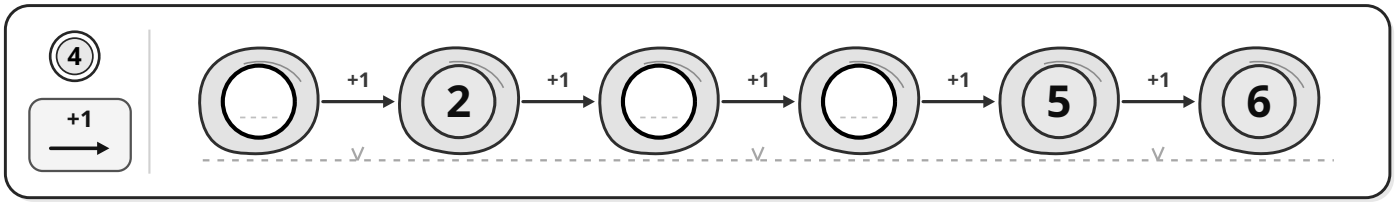

1. Count forward (+1) and write each missing number

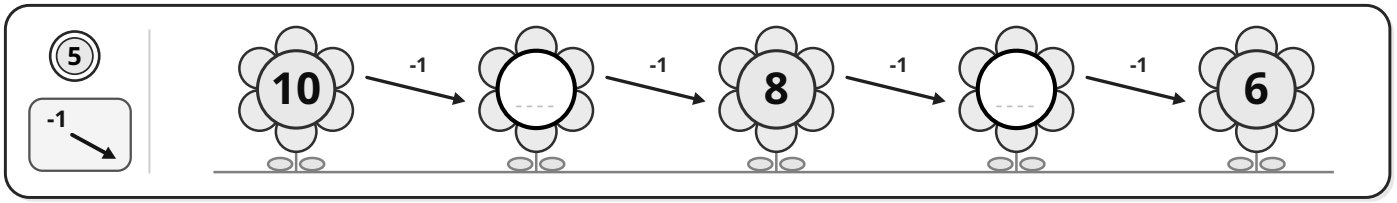

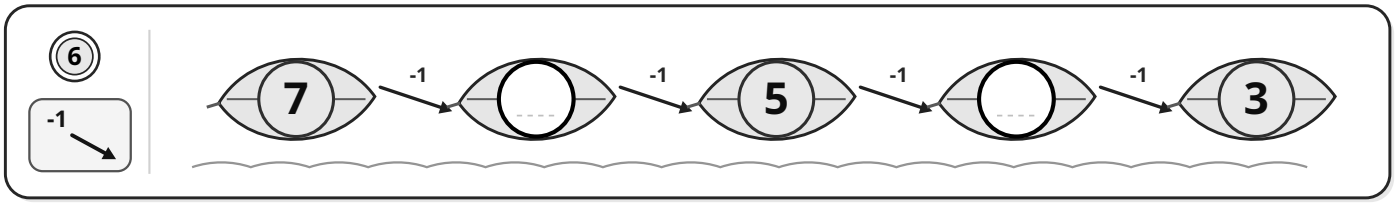

2. Count backward (-1) following the downward arrow

Bibi's tip: check the direction badge first (+1 to count up, -1 to count back), then read the whole trail aloud.
