PAPILUMO / Kindergarten (ages 5–6)

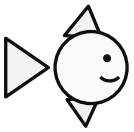

Count 2D Shapes in Pictures

Count how many triangles, squares, rectangles, and circles build each picture, then circle the matching robot shape kit.

Lou the beaver builder loves designing with shapes! Count the pieces in each picture, then circle the kit that matches his robot.

Example: fish

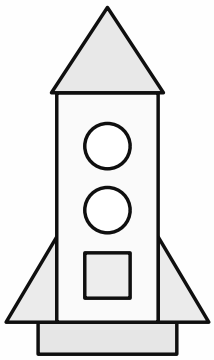

△ 3

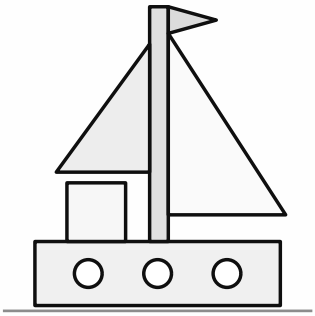

○ 1

1. Write how many of each shape build each composite picture.

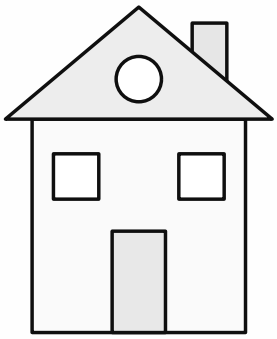

Rocket

Sailboat

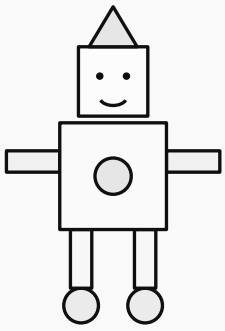

Cozy House

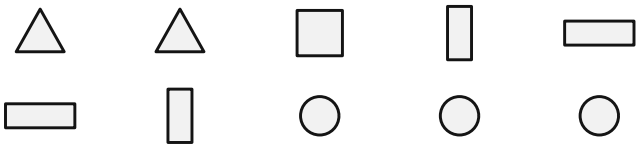

2. Study Lou's target robot and circle which kit (A or B) has the exact pieces.

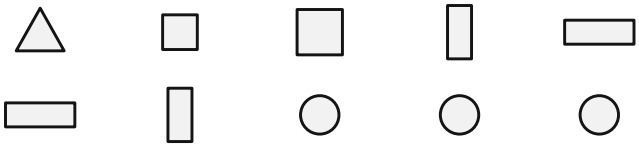

Lou's Robot

Kit A

Kit B

Lou's tip: make a tiny pencil tick inside each shape as you count it so you never count the same piece twice!
