Rounding Three-Digit Numbers to the Nearest 100

Check Bennett's 300–400 segment, mark each number and circle the closer hundred (Part A), then round the 8 numbers (Part B).

Bennett the surveyor beaver measures distances between hundreds! Under 50 rounds back; 50 or more rounds forward.

Model: 300 - 350 - 400 number line

A. Locate each number on the hundreds number line and circle the closer hundred:

230

200 300

475

400 500

650

600 700

819

800 900

B. Round each three-digit number to the nearest hundred inside the answer box:

149 → ☐

283 → ☐

550 → ☐

712 → ☐

394 → ☐

608 → ☐

865 → ☐

962 → ☐

Bennett's tip: check the tens digit (or last two digits)! 00–49 rounds down to the lower hundred; 50–99 rounds up.
