Name : _____ Date : _____

PAPILUMO **Answer key**

15 times table: use 10 and 5

Complete all twelve products. Use 15 = 10 + 5 to help you.

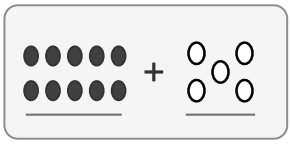

Felix the fox packs 15 seeds in each bag. How many seeds are there altogether?

Example: 4 bags of 15 seeds

15 × 4 = (10 × 4) + (5 × 4)

40 + 20 = 60

Four bags contain 60 seeds.

Find the ×10 part and the ×5 part. Add the two amounts.

1. **15 × 1 =** 10 × 1 + 5 × 1 → **15**
2. **15 × 2 =** 10 × 2 + 5 × 2 → **30**
3. **15 × 3 =** 10 × 3 + 5 × 3 → **45**
4. **15 × 4 =** 10 × 4 + 5 × 4 → **60**
5. **15 × 5 =** 10 × 5 + 5 × 5 → **75**
6. **15 × 6 =** 10 × 6 + 5 × 6 → **90**
7. **15 × 7 =** 10 × 7 + 5 × 7 → **105**
8. **15 × 8 =** 10 × 8 + 5 × 8 → **120**
9. **15 × 9 =** 10 × 9 + 5 × 9 → **135**
10. **15 × 10 =** 10 × 10 + 5 × 10 → **150**
11. **15 × 11 =** 10 × 11 + 5 × 11 → **165**
12. **15 × 12 =** 10 × 12 + 5 × 12 → **180**

The smaller expressions are hints. Every bag holds 15 seeds.
