PAPILUMO / Soluzioni

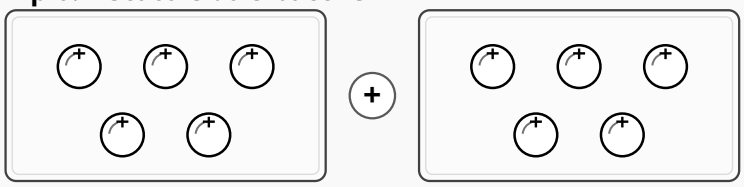

La tabellina del 5 con Sacha

Conta le scatole da 5 bacche e completa le moltiplicazioni.

Sacha lo scoiattolo prepara la merenda: esattamente 5 bacche in ogni scatola!

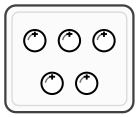

Esempio: 2 scatole da 5 bacche

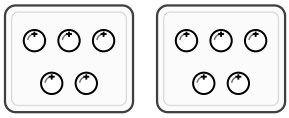

Ogni scatola contiene sempre 5 bacche.

5 + 5 = 10 → **2 × 5 = 10**

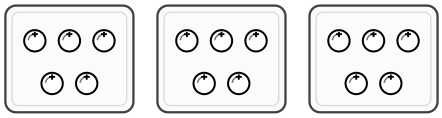

1. Osserva le scatole e calcola.

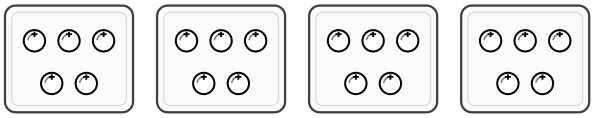

1 × 5 = **5**

2 × 5 = **10**

3 × 5 = **15**

4 × 5 = **20**

2. Calcola gli ordini di Sacha.

9 × 5 = **45**	6 × 5 = **30**	11 × 5 = **55**	0 × 5 = **0**
8 × 5 = **40**	5 × 5 = **25**	12 × 5 = **60**	7 × 5 = **35**

3. Quante scatole servono?

1 **5** × 5 = 25 

2 **10** × 5 = 50 

Il primo numero conta le scatole; il secondo indica le 5 bacche contenute in ciascuna.
