Nome : _____ Data : _____

PAPILUMO | Classe prima (6–7 anni)

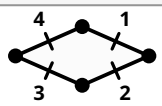

Poligoni: lati e vertici

Segna ogni vertice con un puntino a matita, conta i lati dritti e i vertici, poi scrivi entrambi i numeri.

Balthazar la tartaruga controlla i cartelli del giardino: aiutalo a segnare ogni punta e contare lati e vertici!

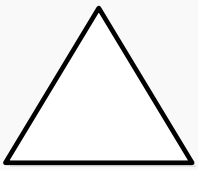

Esempio: il rombo ha 4 lati dritti (trattini) e 4 vertici appuntiti (punti neri).

Rombo → Lati: 4 Vertici: 4

1. Segna ogni vertice e conta i lati e i vertici di ogni figura

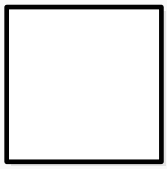

A Triangolo

Lati: ____

Vertici: ____

B Quadrato

Lati: ____

Vertici: ____

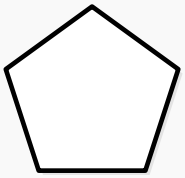

C Rettangolo

Lati: ____

Vertici: ____

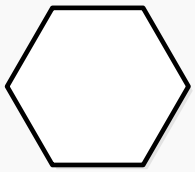

D Pentagono

Lati: ____

Vertici: ____

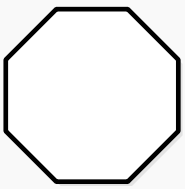

E Esagono

Lati: ____

Vertici: ____

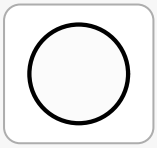

F Ottagono

Lati: ____

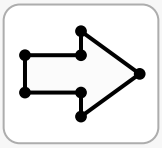

Vertici: ____

2. Osserva e confronta: bordo curvo o figura con lati dritti?

Cerchio

0 lati dritti · 0 vertici (bordo curvo)

Freccia (7 lati · 7 vertici)

In ogni poligono chiuso a lati dritti: lati = vertici!

Consiglio di Balthazar: metti un punto su ogni vertice e un trattino su ogni lato per non contare mai due volte.
