Disegnare le tacche di conteggio

Conta gli oggetti in ogni barattolo, disegna le tacche a gruppi di 5, scrivi il totale e completa la minitabella.

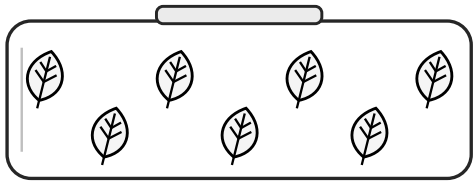

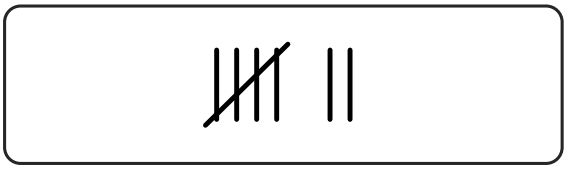

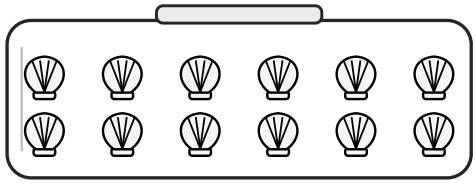

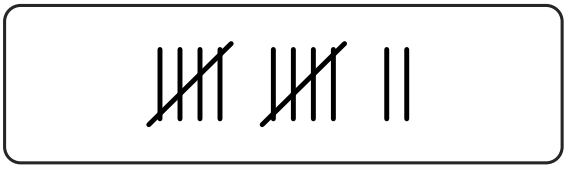

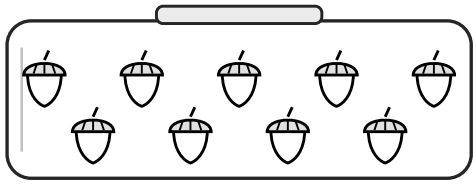

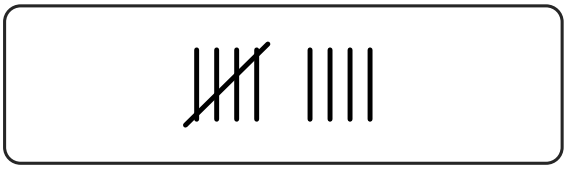

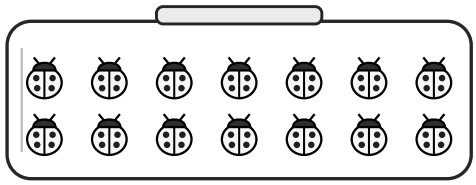

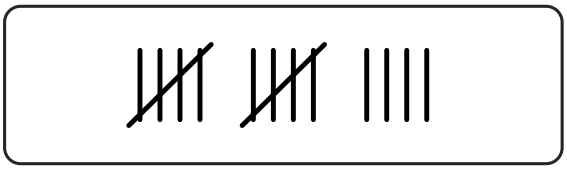

Lungo il fiume, il castoro Leo raccoglie legnetti in fasci ordinati da cinque. Aiutalo a registrare ogni barattolo nella sua tabella!

Esempio: 6 stelle -> 1 fascio barrato da 5 + 1 tacca = 6.

1. Conta ogni barattolo, disegna le tacche a gruppi di 5 e scrivi il totale

Barattolo	Tacche di conteggio (da 5)	Totale
1 		7
2 		12
3 		9
4 		14

2. Minitabella delle forme: leggi le tacche e scrivi i due totali mancanti

Forma	Tacche di conteggio (da 5)	Totale
 Triangolo		8
 Quadrato		11

Consiglio: traccia prima quattro tacche verticali ben distanziate e poi sbarrale con una quinta linea obliqua per formare 5.
