# Schieramenti di moltiplicazione

Parti dal puntino in alto a sinistra, colora il numero giusto di righe e colonne nella griglia e completa le due uguaglianze.

**Trucco: parti dal puntino in alto a sinistra per contare le righe giù e i quadretti a destra!**
Uma l'orsa costruttrice progetta terrazze a quadretti: colora ogni rettangolo!

**Esempio svolto: 2 righe da 4 quadretti**

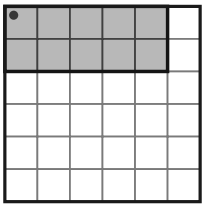

4 + 4 = 8

2 × 4 = 8

**1. Colora ogni rettangolo nella griglia 6×6, poi scrivi l'addizione ripetuta e il prodotto (A–F)**

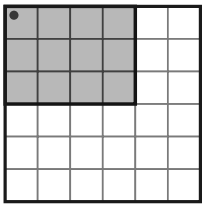

**A** 2 righe × 5

5 + 5 = 10

2 × 5 = 10

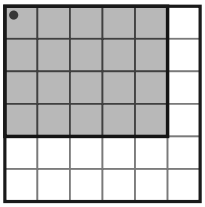

**B** 3 righe × 4

4 + 4 + 4 = 12

3 × 4 = 12

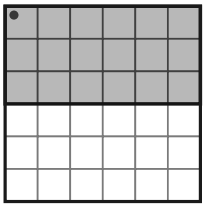

**C** 4 righe × 5

5 + 5 + 5 + 5 = 20

4 × 5 = 20

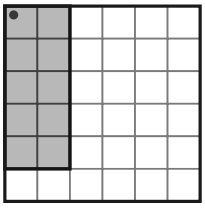

**D** 3 righe × 6

6 + 6 + 6 = 18

3 × 6 = 18

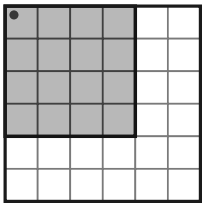

**E** 5 righe × 2

2 + 2 + 2 + 2 + 2 = 10

5 × 2 = 10

**F** 4 righe × 4

4 + 4 + 4 + 4 = 16

4 × 4 = 16

Consiglio di Uma: il primo numero indica quante righe scendono; il secondo dice quanti quadretti formano ogni riga.
