Nome : _____ Data : _____

PAPILUMO / Classe seconda

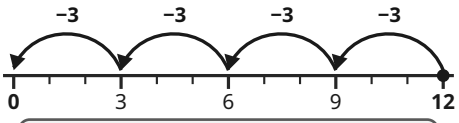

Divisione fino a 24: salti all’indietro

Parti dal numero più grande sulla linea dei numeri, disegna salti uguali all’indietro fino a 0, poi scrivi quanti salti hai fatto.

Bibi la rana vuole tornare sulla ninfea 0! Conta quanti salti uguali all’indietro la portano esattamente sullo zero.

Esempio: 12 ÷ 3

12 ÷ 3 = 4 (4 × 3)

#1 **10 ÷ 2 =** ☐ 10 .. 0 (salti da −2)

#2 **15 ÷ 5 =** ☐ 15 .. 0 (salti da −5)

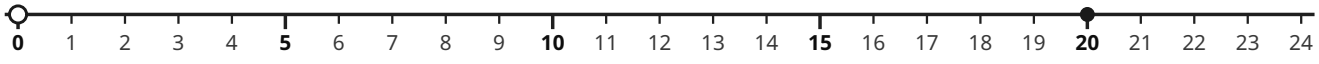

#3 **16 ÷ 4 =** ☐ 16 .. 0 (salti da −4)

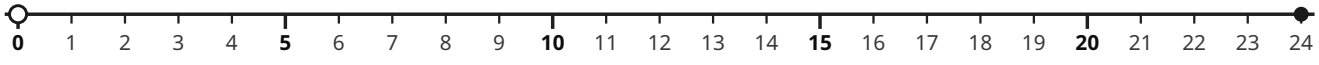

#4 **18 ÷ 3 =** ☐ 18 .. 0 (salti da −3)

#5 **20 ÷ 5 =** ☐ 20 .. 0 (salti da −5)

#6 **24 ÷ 4 =** ☐ 24 .. 0 (salti da −4)

Consiglio di Bibi: controlla che l’ultimo salto atterri proprio sullo 0 prima di contare tutti gli archi!
